

Instructions for the Preparation of Posters for BSD-2008

General Information

The Posters will be presented and numbered according to the list of posters uploaded on the web. Each poster will be in the size of 0.85 m width and 1.2 m height (DIN A 0) vertically oriented. The poster number is mounted by the organizers on top of the board. The author's name and address and the title of the paper are to be indicated on the top section of the Poster. Material for attaching the posters and illustrations (double sided tapes) will be supplied by the organizers. Writing or painting on the poster board is not allowed.

Preparation of the Poster:

As a major guideline it is proposed to make the poster intelligible in itself, even in the absence of the author. It is suggested to divide the contents of each poster into introduction, results and conclusions, with a summary listing the pertinent results and conclusions. The poster should be legible from a distance of 2-3 meters. Please use colors, symbols and schemes for improved clarity.
